

This summer we're going door-to-door in the RM of Piney...

The Seine-Rat River Conservation District is once again offering a completely **FREE**, voluntary well water testing program to residents of the Roseau River Watershed within the RM of Piney.

SRRC D Staff will be going door to door from **June 22 through August 28**. All you have to do is answer a few quick questions and allow our professional staff to gather a water sample from a kitchen or outdoor tap. Horizon Laboratory will contact you directly with your results! If you're often away or have a seasonal residence, give us a call at our Vita field office (204-425-7877) and set up a well water sampling appointment.

Value of Well Water Inventory Participation

It's free - normal cost is \$25-\$35 for a laboratory drinking water analysis

Healthy wells help keep families healthy - *E.coli* and other coliform bacteria can lead to health problems especially in children, the elderly and those who are ill.

We'll fit YOUR schedule – if you're not home when we come by, just give us a shout and we'll come back when it's more convenient for you!
